GOSSOUTDOOR

shading systems

BILLINGE PROJECT, GREATER MANCHESTER | Zeus Independent |

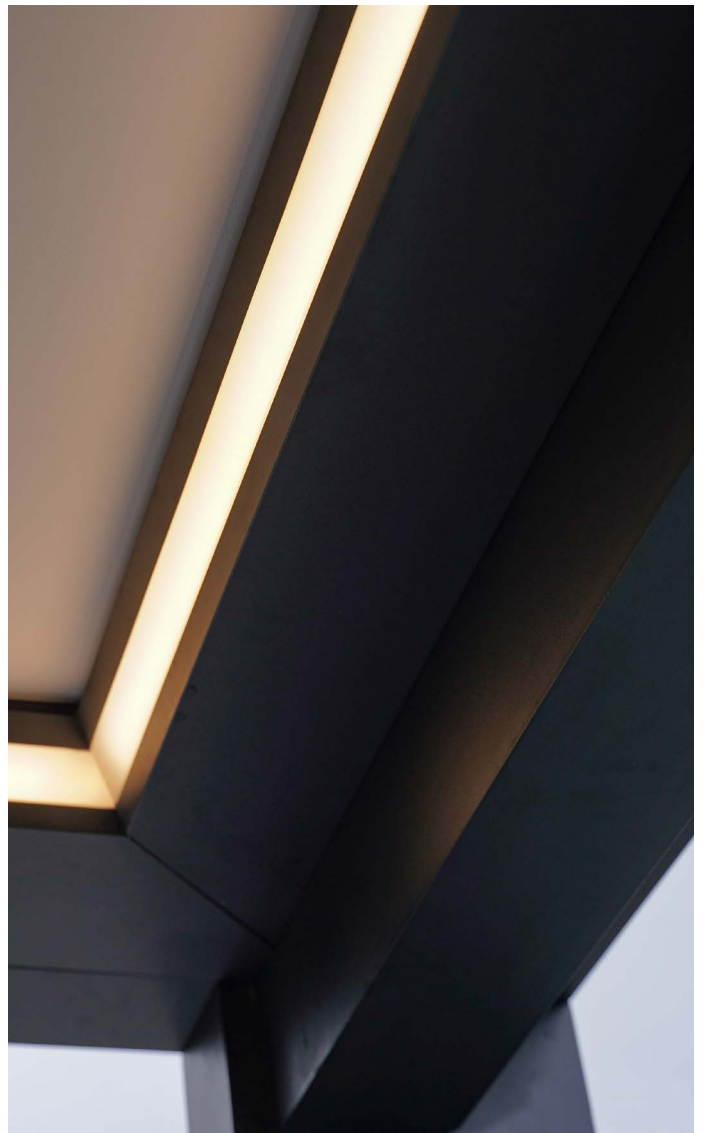

Here is another beautifully finished installation completed by the GOSS Outdoor team, this is a Zeus Independent model which as given in its title comes as a freestanding system. Due to the Independent Zeus being an freedom module the possibilities are endless, and our clients have used their system to cover a lovely spot in their gorgeous garden.

This modern system has many features you can add to your Zeus, such as lighting like this project - you can also add heaters and integrated speakers. Bioclimatic Pergolas add a very modern look to any space that they are installed, so it complements our clients garden wonderfully.

If this system is something you're looking for get in contact with our team now for a quote!
