DAVYHULME PROJECT | SUBULATE QUERCUS MINIMA | Retractable Pergola - System 2

GOSS Outdoor have completed this gorgeous project for a local school and created a fun, creative outdoor space to learn and play for growing minds. The Retractable Pergola has become a great functional addition to the school and allows use for many different purposes, its width allows a vast amount of space to be covered and its ease of use, through SOMFY's technology, brings shade or sun with a click of a button.

As well as fitting this shading system, this project also selected a SOMFY sensor to be added so that their system is under smart technologies protection at all times. This project was completed in the stunning colours Grey Camouflage and Ghost White, giving a modern classic look for the space it was installed.

If you're looking to invest in your property or business whatever it may be, a shading system is a luxurious and modern way to do so - do the best for your outdoor area today and start your outdoor lifestyle with us.

Extras: SOMFY Wind Sensor

DAVYHULME PROJECT | SUBULATE QUERCUS MINIMA | Retractable Pergola - System 1

The system that was attached to the Nursery added the additional wonder of Integrated Spotlight Lighting to the Pergola, which allows those fun times at school to be stretched just a little further. What's even better? This shading system as well as its integrated lighting, can all be controlled from our SOMFY remote control which allows multiple channels to be connected to one remote.
