shading systems

ENFIELD PROJECT LONDON | SUBULATE QUERCUS MINIMA | Retractable Pergola

GOSS Outdoor continues to bring useful solutions to outdoor areas with a rich range of pergola systems. We installed a retractable pergola with a motorised system in our customers garden in Enfield. The system, called Subulate Quercus Minima, is specially designed for the private garden with the fabric and aluminium coating chosen by our customer. Spotlights on the pergola help to create a great ambience in a day or night. It is a great privilege, especially for those who like to spend time outside in winter!
