STAINS-UPON-THAMES, SURREY PROJECT | Orion Cassette Awning | Awning System A stunning Orion System Project completed for another valued customer.

Please take a look at another stunning installation that our team have done! We have installed this orion cassette awning over a quaint, relaxing seating area that our clients can now enjoy all year round - with protection from both sun rays and light drizzle the opportunities for being outside are endless.

Due to the many options that we supply for our awning frames and fabric, our lovely customers have been able to select an awning that compliments their lovely homes. In this project, aluminium frames were chosen in white colour with a gloss finish. Awning fabric was selected from Sattler in beige colour.

Our valued clients also have a SOMFY vibration sensor for their well-loved awning so that they can keep it safe hands-free and worry-free. If you've been looking for a classic system that will elevate your garden and outdoor living area, our Orion Cassette Awning is the perfect system to do so!
