LUGANA BECKENHAM PROJECT GREATER LONDON | SUBULATE ULMUS | Retractable Pergola

A project just as prestigious as the commercial estate it's based on. We are proud to announce that yet another project has been signed off and we are leaving it behind with good memories, great feedback and an excellent outcome. The Subulate Ulmus which was commissioned originally by the 'Lugana Italian Restaurant' in Beckenham, London gave our crew the opportunity to visit their commercial property for the installation of their grandeur shading system, completing it just over the weekend.

The client, DC, has stated that he was very pleased with this product and the installation. We recommend the choice of the Subulate Ulmus, as it is an incredibly versatile product that is suitable for both commercial and private properties. The restaurant management said that the seating area is wider now and the customers especially wanted to stay in this outdoor area because it gives a chance to get fresh air. They also said to us the pergola covered by the glazing systems and sliding doors gives a warmer outdoor area in winter.
