SOUTHPORT PROJECT, MERSEYSIDE | SUBULATE ULMUS | Retractable Pergola

GOSS Outdoor continues to bring useful solutions to outdoor areas with a rich range of pergola systems. We installed a retractable pergola with a motorised system in our customers garden in Southport. The system, called Subulate Ulmus, is specially designed for the private garden with the fabric and aluminium coating chosen by our customer. Spotlights on the pergola help to create a great ambience in a day or night. It is a great privilege, especially for those who like to spend time outside in winter! Also, another positive feature of our products definitely provides a more luxurious look.

Our client Mr RH Said that he wanted to use the decking area more and he contacted us for a solution. He said about the pergola project we have installed, "It gives us more time that we can spend outside in all weathers" He added, "it's reliable and the lights are a big feature."

Mr RH, "When the team came to fit the pergola, we were impressed with their professionalism and they were very polite." We would like to thank our customer, Mr. RH, for giving good comments about our team.
