HIGH WYCOMBE PROJECT BUCKINGHAMSHIRE | TAILOR MADE R2 SUBULATE MINIMA | Retractable Pergola

Our team at GOSS Outdoor has worked together with our client, Mrs AB, to build a magical fortress in her back garden surrounded by stunning views of the outdoors, wooden fences, pillars, and one of our retractable pergola shading systems. Depending on the mood, Mrs AB is able to retract the roof of her new pergola with its remote-controlled functionality and enjoy her private outdoor relaxation spot!

After the installation, our client said that she feels the shading system looks and works great, fitted in perfectly and worth every penny spent!

Mrs AB said that she bought a pergola because she wanted to use outdoor space even on rainy or very sunny days. She thinks the view of her garden has changed after installation. Mrs A.B, "before installation of the pergola, we never spent so much time in the garden, but after pergola, we are having lots of time. I thank the product because it has really good quality and it's worth the price." She highly recommends our pergola systems which we are flattered about and incredibly happy that we signed off another stunning project!
